Children often have a great fascination for dinosaurs; their names, what they looked like, where they lived, and when they lived. As a result, evolutionists have used dinosaurs to help establish a cultural indoctrination that dinosaurs prove evolution and disprove the Bible. So, even as our childhood fascination fades, this indoctrination remains entrenched in our thinking. Yet, a proper study and understanding of dinosaurs fails to support of evolutionary teachings, and is actually fully consistent with biblical teachings on creation and the flood.
