We live in an orderly universe. Does that order happen by chance or must it be directed?

Is order in the Universe breaking down? If it is, what does the break down say about the past *and* our future?

How does the concept of *order* bear directly upon the theory of *evolution*? What arguments exist to possibly support evolution in spite of the order we see?

## For God is not a God of disorder... (1 Cor 14:33a)

**This meeting, as with all  
AzOSA meetings, is FREE!**
